

Exhibitor Safety Plan

Moncton Coliseum – Atlantic Heavy Equipment Show

Master Promotions Ltd. and Moncton Coliseum have worked with the Province of New Brunswick to develop a safe reopening plan for exhibitions at the Coliseum. As a result, we will have protocols in place during the event to ensure a positive and safe experience for everyone involved. We know you have questions. The following may answer some of them but meantime, reach out to our team at any time. We will be happy to fill in the blanks for you!

- Atlantic Canada Bubble only – including exhibitors and attendees
- Mask wearing will be mandatory during all times within the building. Exception will be when seated in the restaurant area and eating/drinking.
- The floor plan will be a little different with directional traffic and social separation between non-bulk booths so that visitors and exhibitors will feel safe and comfortable.
- For bulk booths, show management will work with you to sort out your floor plan so it is compliant. For smaller booths, there will be protocol provided for you to lay out your booth and as always, we'll be there to help you.
- We will have lots of show staff available to direct traffic, monitor social distancing, answer questions, and help attendees feel safe and informed.
- Contact tracing will be taken care of by show management
- Extra hand sanitizer will be available throughout the facility. Exhibitors are asked to provide their own hand sanitizer available for attendees to use at each booth.
- When viewing units, you will admit one “bubbled group” at a time and as you are used to doing and perform cleaning of touch points on a frequent basis.
- And of course, regular hand washing, sanitization and social distancing will be enforced with signage and floor decals.
